The Act at a glance

The National Sovereignty and Resilience Act is a complete federal statute of 36 titles and 218 sections. It does not increase deficit spending; it redirects, recaptures, and rebalances revenue through a closed-loop fiscal engine and returns measurable benefits to households. It is owned by no party and published in full for whoever runs on it first.

What problem does the NSRA solve?

Value that should remain in the domestic economy — corporate rents, adversary capital, monopoly drug pricing, and untaxed extraction — currently leaks out while households absorb the cost. The NSRA recaptures that value through mechanical triggers and strict-liability enforcement and returns it as concrete household relief, without new broad-based taxes.

What are its major public benefits?

$35 insulin and G7-matched drug prices; a cap on corporate single-family landlords at 50 units per metro; universal basic minimum coverage for the roughly 28 million uninsured; student-loan relief; expanded veterans' health; and a ban on congressional individual-stock trading.

How is it financed?

Recapture of value leaving the economy across roughly seventeen enforcement and revenue streams — payroll-cap and corporate-rate restoration, IRS enforcement, an OECD Pillar Two minimum tax, a financial-transaction levy, royalty modernization, fraud recovery, and others — not broad-based tax increases. Every stream is documented in Schedule G and the Figure-by-Figure Sourcing.

What begins in Year 1?

Statutory price caps, the corporate housing cap, initial enforcement activation, and first-year household relief reaching more than 79 million Americans, subject to the tranche-based escalation lock that phases benefits with verified revenue.

What is conditional on revenue or certification?

Expanded outlays phase in behind the Deficit Neutrality Certification and SIRF capitalization gates. Benefits scale as verified revenue arrives — protecting against macroeconomic shock and preserving deficit neutrality.

What is the projected fiscal effect?

A modeled roughly $554 billion annual deficit reduction and a central balanced-budget projection by Year 4, on low/base/high scenarios.

Why are the titles integrated?

Revenue, enforcement, and benefit provisions are interdependent by design. Titles are severable and can move alone under Section 205, but separating a benefit from its funding or enforcement changes its fiscal effect. Each title carries a dependency label so reviewers can see what must travel together.

What does adoption require?

Anywhere from a 30-minute briefing to sponsorship of a single title to full congressional introduction. No endorsement of TheAmericanDeal, Inc. is required — the statutory text is published for public use.

Core figures — with status labels

Figure	Value	Status
Annual base-revenue model	**$749B**	Internally modeled on published federal, institutional, and academic baselines. Official congressional scoring pending introduction.
Modeled annual deficit reduction	**$554B**	Internally modeled and sensitivity-tested; not an official CBO/JCT score.
Central balanced-budget projection	**Year 4**	Low/base/high scenarios modeled.
Americans directly protected	**79M+**	28M uninsured · 42M SNAP · 9M veterans (Year-1 reach).

What adoption means

Four legitimate routes: **Full Framework Adoption** (integrated platform or introduction-ready package); **Congressional Introduction** (legislative-counsel review, scoring, referral, introduction); **Title or Policy-Node Adoption** (a single title, preserving its fiscal and enforcement dependencies); and **Platform Adoption** (a governing platform for candidates and caucuses, without representing the framework as introduced legislation). Request a briefing at contact@theamericandeal.org.

Evidence standard: Fiscal and impact figures are NSRA model estimates built on published CBO, JCT, OMB, GAO, Treasury, SSA, OECD, and peer-reviewed baselines — internally modeled and sensitivity-tested, not yet officially scored by CBO or JCT, which is pending and welcomed. Statutory parameters (e.g., the $35 insulin cap, the 50-unit corporate housing cap) are the text of the bill, not projections. TheAmericanDeal, Inc. is a Wyoming 501(c)(4) civic-education organization; materials are informational and non-partisan.
